

GREENLANDS FARM PROJECT

48 PANELS

12 KWP

Greenlands Farm,
Catterall, PR3 0HL

”

**we are very proud to
have achieved carbon
reductions of 45%**

Introduction

At Greenlands Farm we installed 12 kWp of solar, totaling to approximately 48 panels on their farm in Preston.

Greenlands Statement

The adviser that came to see me on my first visit was a lovely man and didn't pressure me at all. Very informative! I am saving a great amount and not had any problems at all. It was a 10/10 install from the team and I'm very Happy.

Key Figures

- ✓ 45% energy consumption reduction
- ✓ 45% carbon emission reduction
- ✓ 1500 kWh of energy produced per month

What are the benefits of this system?

This system will mean that their monthly spending on energy bills will fall by a massive 45% due to them using the energy that they have produced on-site. This system will also reduce their carbon emissions by over 7000 Kilograms. That's 7000 5-Month-Old Babies!
